

Larsen Engineers Adds New Staff and Dondi Harner Earns CPESC Designation

Larsen Engineers announces several new additions to the company.

Craig Eckert has recently joined as a design engineer. He holds a bachelors of science degree in civil engineering from Rochester Institute of Technology and has worked in the engineering field for over three years. His experience includes site design, cost estimating, traffic analysis and drafting. He holds an Engineer in Training certificate and is working with the transportation group and providing construction inspection, CAD and design services for municipal clients.

Darren Harvill holds a bachelors of science degree in civil engineering from Rochester Institute of Technology and has worked in the engineering field for 6 years. Darren has his Engineer in Training certificate and is providing CAD design services and assisting project managers with civil/site development, drainage design and stormwater permitting.

Ellen McCoy has a BA degree in engineering science from the University of Rochester and is a LEED Accredited Professional. She is currently assisting the energy services team with grant writing and research on waste to energy, pollution prevention and lean energy and environments.

Louis Barrios and Reid Denis are providing construction inspection services. Mr. Barrios is a level IV inspector and brings has over 27 years of experience to the team. He is currently assigned to the NYSDOT's I-86 Reconstruction Project in Chautauque County. Mr. Denis is a recent graduate of Clarkson University and has previous field experience with NYSDOT's Region 3. He is currently an inspector overseeing a Region 7 bridge painting contract for the NYSDOT.

Donald M. Harner, EIT, LEED AP, (Dondi) has recently earned designation as a Certified Professional in Erosion and Sediment Control (CPESC). This certification confirms Dondi's expertise in the design and evaluation of erosion and sediment control plans as well as his ability to influence public policy and land-use planning decisions.

Dondi started with Larsen Engineers in 2007 as an intern. Upon graduating with a bachelor's degree in civil engineering from Rochester Institute of Technology in 2008, he was hired full-time, as a project/design engineer.
